SUMMARY

Junior full-stack developer focused on frontend. I work with SvelteKit, React, and TypeScript for the frontend and NestJS with MySQL for the backend. Prefer frontend but handle backend when needed.

PROJECTS

CodeArc   Nov 2024 - Present

- Developed DevFlow, a platform for managing developer teams and projects, featuring a database planner, task management, project tracking, and AI-powered code quality checks. It also includes API documentation similar to Swagger for managing endpoints.
- Built with SvelteKit, TypeScript, TailwindCSS, and ShadCN. Integrated API documentation and database planning features.

Azura [(live demo)](#)   Feb 2025 - Mar 2025

- Built Azura, an NFT marketplace where users can generate NFTs using AI prompts, mint, and sell them. Features include NFT merging and upgrades.
- Developed the UI with SvelteKit, TypeScript, TailwindCSS, and ShadCN, integrating D3.js for visualizing marketplace trends.

CinemaView   Jan 2023 - Apr 2023

- Developed a shift scheduling app for cinema employees to self-select shifts, reducing manual scheduling.
- Built the UI using SvelteKit, TypeScript, and TailwindCSS, implemented JWT authentication, and added QR code-based TOTP for security.

EDUCATION

BMSZC Petrik Lajos Két tanítási Nyelvű Technikum   Sep 2022 - June 2023
Software developer and tester

- Selected for dual training: Chosen as one of 15 students for a 3-month program at Webváltó Kft., where we built our exam project.
- Mentored learning: Worked under a mentor, had regular meetings, and gained hands-on experience in a real development environment.

BMSZC Újpesti Két Tanítási Nyelvű Műszaki Technikum   Sep 2017 - June 2022
Computer Network Maintenance

SKILLS

- **Frontend:** SvelteKit, React, TypeScript, JavaScript, Shadcn
- **Backend:** NestJS, mySql
- **Other:** Git, GitHub
