Summary

Full-Stack Developer specializing in **React, TypeScript, and Express.js**. Awarded **Grade 5/5** in the University of Helsinki's **Full Stack Open**, demonstrating mastery in building RESTful APIs, managing MongoDB databases, and implementing automated testing. Experienced in delivering end-to-end web applications, from responsive frontends to secure, scalable backends.

Experience

Freelance Fiverr (Client Project)

Frontend Developer   Jun 2025 - Aug 2025

- Developed the frontend for "GamingWithMe," a gaming community platform, using **React.js** and **TypeScript**.
- Collaborated with a Backend Developer to integrate **RESTful APIs**, ensuring smooth data synchronization for user profiles and gaming sessions.
- Implemented responsive UI components and dark-mode styling using **Tailwind CSS**, following the client's specific design requirements.
- Managed version control and deployment workflows via **GitHub**, maintaining clean code practices for team collaboration.

Webváltó Kft.

Web Development Intern   Jan 2023 – Apr 2023

Contributed to a full-stack cinema scheduling application, building a self-service UI in **Svelte** and integrating it with a **TypeScript-based REST API**.

Projects

Social Media Platform (Revalo) (React, TypeScript, TailwindCSS)   Feb 2025 - Jul 2025

Architected a scalable hub with real-time messaging and complex state management

https://revalo.vercel.app/

Crypto Marketplace (Svelte, TypeScript, TailwindCSS)   Sep 2023 – Jan 2024

Built interactive UI flows for NFT auctions and integrated **D3.js** for dynamic price charts.
